

Odisha Crops — Expanded Remaining Crops Table (Zero-Loss Measures & Selling Channels)

This document expands the "Remaining Crops" table to include every crop listed previously (vegetables, fruits, oilseeds, spices, floriculture, fishery, dairy & poultry, cash crops). Each row lists: normal shelf life, cold storage/extended life (where applicable), practical zero-loss actions, and preferred selling channels. It also contains: contact templates (email & SMS) for automated notifications, an n8n workflow diagram, and a system workflow diagram.

Category	Crop / Item	Normal Shelf Life	Cold Storage / Extended Life	Zero-Loss Measures & Selling Channels
Vegetable	Tomato	3–5 days	10–14 days	Flash sale; supply to hotels/retailers; link to processing (paste/puree); cold chain pickup; FPO/SHG processing; govt procurement for schemes.
Vegetable	Potato	20–30 days	3–6 months	Cold storage stacking; contract with chips/processing units; wholesale markets; FPO aggregation.
Vegetable	Onion	30–60 days	3–6 months	Curing & storage; sell to bulk retailers & processors; cold storage; export aggregators; onion cold-chain auctions.
Vegetable	Brinjal (Eggplant)	2–3 days	7 days	Rapid local market sale; bundle offers to vendors; short-term cold storage; process into pickles by SHG.
Vegetable	Cabbage	5–7 days	20–30 days	Supply to institutional buyers; cold storage; processing into frozen cuts; FPO aggregation.
Vegetable	Cauliflower	3–5 days	10–15 days	Flash sale to hotels; blanch & freeze; supply to veg processors; SHG pickling.
Vegetable	Capsicum (Bell pepper)	5–7 days	15–20 days	Supply to fresh produce retailers & exporters; cold chain; value-add packaging.
Vegetable	Chillies (green & dry)	5–7 days (fresh)	20–30 days (dried)	Drying & powdering units; supply to spice processors; cold/dry storage; contract with masala companies.
Vegetable	Pumpkin	30–60 days	90–120 days	Longer storage; sell to wholesale markets; processing into puree; FPO aggregation.
Vegetable	Bottle gourd	4–6 days	10–15 days	Local wholesale/retail buyers; SHG pickling; short cold storage.
Vegetable	Ridge gourd	3–5 days	10 days	Local markets and hotels; quick dispatch; small-scale processing.
Vegetable	Bitter gourd	3–5 days	7–10 days	Supply to institutional cooks; drying into chips; tie-ups with vegetable processors.
Vegetable	Lady's finger (Okra)	2–3 days	7 days	Rapid merchant pickup; flash discounts; supply to frozen veg processors.
Root/Tuber	Sweet potato	7–10 days	1–2 months	Cure & dry; supply to snack processors; cold storage; value-add (chips, powder).
Root/Tuber	Yam	20–40 days	2–4 months	Cold storage; supply to processors; long shelf roots for seed/food.
Root/Tuber	Taro (Arbi)	10–15 days	30–45 days	Supply to local markets & processors; drying.
Root/Tuber	Carrot	4–5 days	20–30 days	Cold storage; supply to juicers & processors; blanch & freeze.

Category	Crop / Item	Normal Shelf Life	Cold Storage / Extended Life	Zero-Loss Measures & Selling Channels
Root/Tuber	Radish	3–4 days	10–14 days	Local sale; pickling by SHG; cold storage for extension.
Root/Tuber	Beetroot	7–10 days	1–2 months	Supply to processors; cold storage; juice/powder processing.
Fruit	Mango	4–7 days	20–30 days (controlled)	Ripening chambers; pulp/juice processing; export aggregators; tie-ups with pulp units; value-add (dried, jam).
Fruit	Banana	2–4 days	10–14 days (managed)	Bulk sale to processors & hotels; quick logistics; banana chips & powder processing.
Fruit	Guava	2–3 days	7–10 days	Supply to juice processors; pulp units; short cold storage; FPO aggregation.
Fruit	Papaya	3–5 days	15–20 days	Pulp/juice processing; bulk sale to hotels; cold chain for late harvests.
Fruit	Pineapple	4–6 days	20–25 days	Pulp & juice processing; canning units; export aggregators.
Fruit	Sapota (Chikoo)	2–3 days	10 days	Processing into jam/pulp; supply to local markets; cold chain pickup.
Fruit	Lemon	7–10 days	30–45 days	Cold storage; juice concentrators; supply to beverage companies; FPO packing.
Fruit	Ber (Indian jujube)	7–10 days	20–30 days	Drying & preservation; local markets; pickling processing.
Fruit	Custard apple	2–3 days	5–7 days	Immediate sale to local markets; pulp processing for preserves; FPO aggregation.
Fruit	Jackfruit	5–7 days	20–25 days	Pulp & canned products; export processed units; seeds for chips.
Fruit	Litchi	2–3 days	10–15 days	Cold chain & quick export; pulp & dehydration; supply to markets.
Oilseed	Groundnut	3–6 months	9–12 months	Oil extraction units; pack as kernels; oilcakes to cattle feed; FPO-led processing.
Oilseed	Mustard	6–9 months	1 year	Oil mills; packaged oil; MSP procurement in some schemes; FPO aggregation.
Oilseed	Sesame (Til)	6–12 months	1.5 years	Sell to oil & tahini processors; dry storage; value-add sesame oil & paste.
Oilseed	Sunflower	3–4 months	9 months	Oil extraction; pack sunflower oil; cold/dry storage for seeds.
Oilseed	Niger seed	6 months	12 months	Oil extraction; sell to processors; storage.
Oilseed	Castor	1 year	2 years	Industrial buyers for castor oil; packaging for export.
Spice	Turmeric (fresh)	7–10 days	—	Drying & powdering; essential oil extraction; sell as dried spice with long shelf life.
Spice	Turmeric (dry)	1–2 years	—	Pack & sell to spice traders & exporters; value-add powders.
Spice	Ginger	7–10 days	2 months	Cold storage & drying; value-add powder & oil extraction; sell to spice processors.
Spice	Coriander	8–10 months	—	Dry storage; sell to masala processors; powdering & packaging.

Category	Crop / Item	Normal Shelf Life	Cold Storage / Extended Life	Zero-Loss Measures & Selling Channels
Spice	Cumin	1 year	—	Sell to spice mills; packaging & export aggregators.
Spice	Black pepper	2–3 years	—	Dry storage; pack & sell to spice traders & exporters.
Spice	Betel vine (Paan)	2–3 days (very perishable)	—	Immediate local sale; supply to betel markets; cold pack for short extension; SHG value-add.
Flower	Marigold	2–3 days	7 days	Bulk buyers (temples, events); conversion to dried flowers & agarbatti; FPO aggregation.
Flower	Rose	2–3 days	7–10 days	Bulk buyers (weddings, florists); cold chain; conversion to rose water/gulkand; FPOs.
Flower	Jasmine	1–2 days	4–5 days	Supply to perfumers & temples; quick pickup; drying for value-add.
Flower	Tuberose	2–3 days	7 days	Export floriculture buyers; bulk temple markets; drying & oil extraction.
Flower	Chrysanthemum	3–4 days	10 days	Bulk buyers & processing into natural dyes; cold chain packaging.
Flower	Lotus	1–2 days	3–4 days	Temple bulk buyers; immediate local markets; drying for crafts.
Fish	Rohu	6–8 hours (no ice)	2–3 days (iced/frozen)	Immediate cold chain pickup; iced transport to processors; freezing & export processors; govt fisheries buyback schemes.
Fish	Catla	6–8 hours	2–3 days	Iced transport; supply to hotels & processors; freezing/drying.
Fish	Hilsa	6 hours	2 days	Quick icing & refrigerated shipping; supply to premium buyers/export; frozen processing.
Fish	Prawns	4–6 hours	2 days	Immediate iced boxes; freezing & export; shrimp processors; govt schemes for cold chain support.
Fish	Crabs	12–18 hours	2–3 days	Iced transport; live shipping to markets; freezing/drying processors.
Dairy	Milk	6–8 hours (unrefrigerated)	2–3 days (chilled)	Chilling centers; convert to paneer/curd/ghee; dairy cooperative tie-ups; timed pickups.
Dairy	Eggs	7 days (fresh)	20–30 days (refrigerated)	Supply to hotels/schools; cold storage; egg aggregators & packers.
Meat	Chicken	6–8 hours	2–3 days (chilled)	Immediate processing to frozen cuts; supply to meat processors & hotels; cold chain.
Meat	Goat meat	6–10 hours	2–3 days (chilled)	Processing into frozen meat; direct link to slaughterhouses & meat processors.
Livestock	Sheep wool	6–12 months	2 years	Sell to textile processors; bale storage; FPO aggregation.
Cash Crop	Sugarcane	3–5 days (raw)	10–15 days	Immediate supply to sugar mills; coordinate harvest schedules with mills; FPO aggregation; transport optimization.
Cash Crop	Cotton	6–12 months	—	Ginning & bales; sell to textile mills; warehousing.
Cash Crop	Jute	6–12 months	—	Sell to jute mills; bale storage; FPO tie-ups.

Category	Crop / Item	Normal Shelf Life	Cold Storage / Extended Life	Zero-Loss Measures & Selling Channels
Cash Crop	Tobacco	12–24 months	—	Process/curing; sell to leaf tobacco companies; storage.
Cash Crop	Coconut	20–30 days (fresh)	12 months (dry)	Coproducts (coir, oil); processing for desiccated coconut; dried coconut packaging.
Cash Crop	Arecanut	6–12 months	—	Drying & storage; sell to areca processors & markets.

System Zero-Loss Pipeline (Flow Diagram)

n8n Workflow: No-Buyer -> Fallback Automation (Diagram + Steps)

Contact Templates (Email & SMS) — Use for Automated Notifications

Email Template:

Subject: URGENT: Unsold Listing — {crop} (Farmer: {farmer_name}) — Action Required

Dear {recipient_name},

This is an automated notification from [YourPlatformName].
The produce listed by {farmer_name} ({village}, {district}) — {crop} — was not purchased within the listing window ({listing_time}).
Please take one of the following actions immediately:

- 1) Arrange procurement pickup at {pickup_location} today.
- 2) If procurement is not possible, accept at the agreed fallback rate or inform for cold storage allocation.
- 3) If interested in processing, contact the farmer at {farmer_contact} for collection details.

Listing details:
- Crop: {crop}
- Quantity: {quantity}
- Harvest date: {harvest_date}
- Expected expiry: {expiry_date}
- Listing ID: {listing_id}

Regards,
[YourPlatformName] Operations Team

SMS Template:

ALERT: Unsold {crop} ({quantity}) by {farmer_name}. Please respond: PROCURE / STORAGE / PROCESS within 4 hrs. Ref: {listing_id}.

Appendix: n8n Implementation Notes & API Hooks

- Use a 'Webhook' trigger in n8n to receive new listings from the platform.
- Use a 'Wait' node configured for the listing timeout (e.g., 48 hours).
- Next, call a 'HTTP Request' node to query buyer-matching service (internal API).
- If buyer found -> 'Notify Buyer' (Email/SMS) and mark listing sold.
- If no buyer -> route to parallel branches: Flash Sale (update listing price), Notify FPOs and Cold Storage, Trigger Processing Unit order, and finally Notify Govt Procurement webhook.
- Use a 'Twilio' node (or SMS provider) and 'Send Email' node for communications.
- Log all decisions in a central DB via 'HTTP Request' node to your backend (POST /listing/actions).
